

**Richard A. Deyo MD MPH**

[Oregon Health and Science University](#)

Kaiser Permanente Professor of Evidence-Based Family Medicine,  
[deyor@ohsu.edu](mailto:deyor@ohsu.edu)

Dr. Deyo is a general internist and Deputy Editor of *Spine*, and co-edited the book *Evidence-Based Clinical Practice: Concepts and Approaches*. He is an active member of the Association of American Physicians, the American College of Physicians, the Society of General Internal Medicine, and the International Society for the Study of the Lumbar Spine.

Dr. Deyo has a long-standing research interest in measuring patient function, involving patients in clinical decisions, and managing low back pain. He was a member of the AHCPR guideline panel for acute low back problems, and of a National Academy of Science panel on Musculoskeletal Disorders in the Workplace. He is a member of the Board of Directors of the non-profit Foundation for Informed Medical Decision-Making. He has recently been studying inappropriate use of medical technology, and the commercial, political, and media forces that affect it. The resulting book, *Hope or Hype: The Obsession with Medical Advances and the High Cost of False Promises*, was published in 2005.
